A thoroughly independent publication, and our aim is to make it the most complete and reliable paper of its class. All reading matter classified into three general departments, viz: (1) Pharmaceutical Department; (2) News Department; (3) Trade Department. Each semi-monthly issue of the paper contains not less than 48 pages of reading matter.

Subscription price \$2.00 per year, payable in advance.

THE ERA DRUGGISTS DIRECTORY.—A complete, and the only, directory of the drug trade of the United States. This publication is intended for all firms who desire an accurate list of this trade. The contents are divided into four parts, viz.: Part I—Wholesale Druggists; Part II—Retail Druggists; Part III—Manufacturers; Part IV—Classified Business Directory.

The third edition will be issued about January 1, 1894. Price \$5.00 per copy.

THE ERA DOSE BOOK.—Originally intended to give our subscribers a list of doses of new remedies and the U.S.P. preparations, printed in convenient shape for quick reference in checking off prescriptions. As the work advanced the book developed, and the first edition (1892) contained the following: (1) Table of Dose Equivalents; (2) Doses of Drugs, Chemicals, New Remedies, etc.; (3) The Metric System and Tables of Equivalents; (4) Solubilities of Chemicals; (5) Table for preparing Percentage Solutions; (6) Thermometric Equivalents; (7) Doses of Veterinary Remedies. A new and enlarged edition will be ready in September, 1893. It will contain doses of all the preparations in the new U. S. THE ERA PUBLICATIONS

(CONTINUED.)

THE ERA FORMULARY—The object of this work is to furnish druggists with a reliable formulary of unofficial preparations. Many of the formulas contained therein are the results of competition for the best formulas in the various classes. To this collection has been added the best formulas we could find from a careful examination of the best formula books published in English, French and German, as well as the standard pharmaceutical publications. We claim this book to be the best collection of formulas ever offered for druggists' use. The contents of the book are classified into nine parts, as follows:

- Part 1—Unofficial Pharmaceutical Preparations
- Part 2—Proprietary Preparations.
- Part 3—Toilet Articles.
- Part 4—Veterinary Remedies.
- Part 5—Family Medicines.
- Part 6—Household Formulas.
- Part 7—Technical Formulas.
- Part 8—Paints, Varnishes, etc.
- Part 9—Miscellaneous and Unclassified.

This collection of 5,000 formulas in the Era Formulary is continued in the *Pharmaceutical Era* from and after the issue of July 1st, 1893.

The price of the Era Formulary is \$5.00 per copy, post-paid.
